ROCKET INSTALLATIONS IN LITHUANIA.

The former training area of the Lithuanian army located at JONAVA, a short distance North-East of KAUNAS, has been taken over by the Russians and large V-2 ^(F-6) installations and experiments are being conducted there. Flashes and rocket activity can be plainly seen from time to time.

An area of radius approximately 15 km has been placed under barb-wire protection and heavy armed guard. All persons living in this area have been removed; the buildings formerly used by the Lithuanian armed forces have been taken over by Russian troops guarding the area and by the great number of Russian and German technicians working at the installations there.
